

Please consider my opinion as a consumer. I would greatly hope the commission will not entertain any thought of granting this petition. As a full time working mother, wife, and part time student I am VERY protective of my families privacy and time. Before the no call list was enacted in Indiana, I would have to come home and shut the phone off. The phone rang so much otherwise it was unbearable. Telemarketers have no right to contact me, or my husband on a phone that we work hard to pay for. Before the no call list was created, we discussed cancelling our phone service. If this petition is granted, rest assured, we will help the floundering communications companies in continuing their decline by cancelling our service. I will not pay for something to allow unwanted invasions in our privacy.

Thank you for your consideration.
